Vi står foran skæbnesvangre udfordringer når det angår borgernes civile rettigheder, over alt i verden. Dataprivacy er en menneskeret. Folk i alle sektorer er nødt til at forstå at dataprivacy og udvikling af sektorer ikke er en modsætning.

Vores største opgave i 2022 er at få jurister til at forstå at Privacy by design / by default ikke kun er en etisk forpligtelse, og en juridisk konstruktion, men et fundamentalt krav om teknisk implementering i alle sammenhænge.

-Ønsker alle en dejlig juleferie og et lykkebringende nyt år 2022 (Danish)

We face fateful challenges when it comes to citizens' civil rights, all over the world. Data privacy is a human right. People in all sectors need to understand that data privacy and sector development are not an opposite. Our biggest task in 2022 is to make lawyers understand that Privacy by design / by default is not only an ethical obligation, or a legal framework, but a fundamental requirement for technical implementation in all contexts.

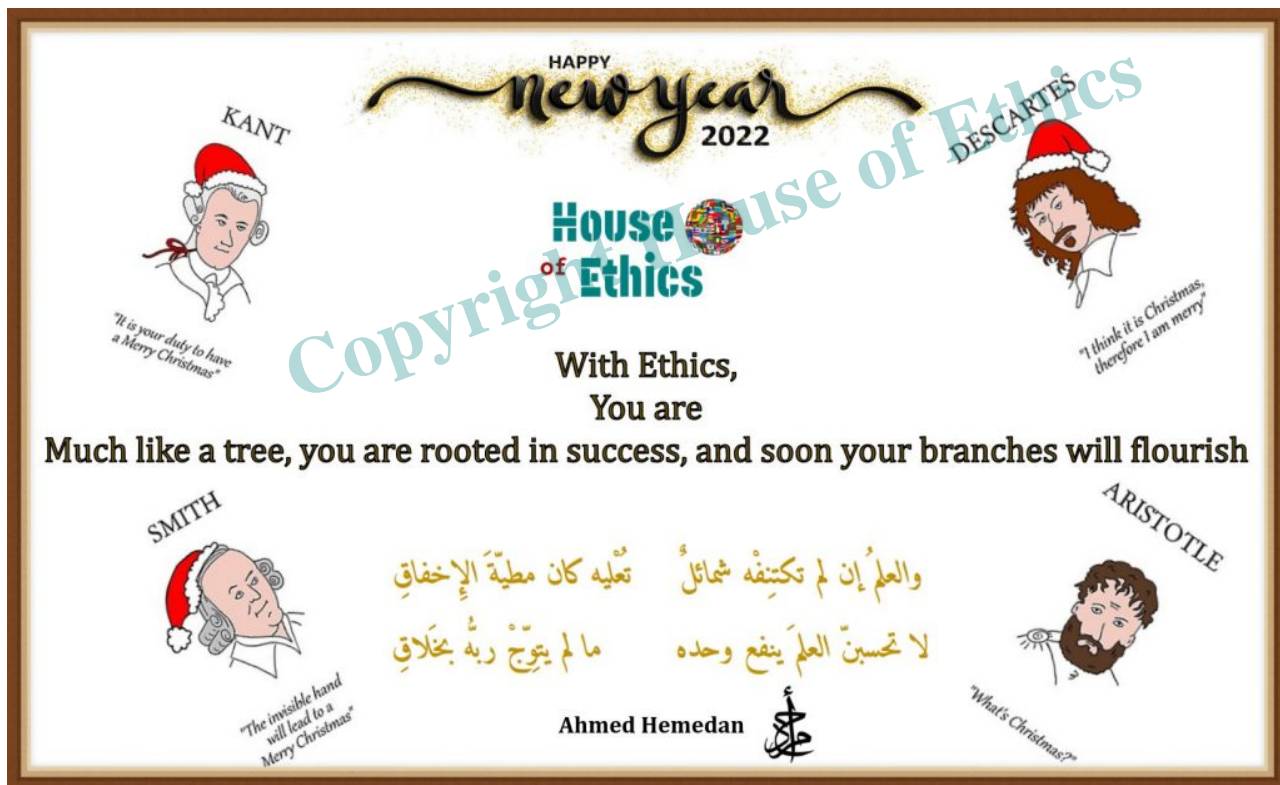

-Wishing you all a happy and healthy Christmas break, and a joyous & prosperous new year 2022

« En cette période de Noël, je souhaiterais faire vœu de simplicité pour l'année à venir. Nos sociétés sont marquées par une succession de règles, processus et outils de moins en moins intelligibles. La simplicité du détail ne doit plus primer sur le global, laissant le premier travestir le second. Cette simplicité doit pour autant refléter la vérité sans la réduire de manière outrancière. L'enjeu est bien sûr démocratique, mais impacte également la performance de nos organisations et la confiance que nous leur accordons.

En 2022, efforçons nous d'être simple et d'être vrais. «

« During this Christmas period, I would like to express a wish towards simplicity for the year to come. Our companies are branded by a succession of rules, processes and tools that are less and less intelligible. Simplicity of detail should no longer take precedence over the global, leading the former to disguise the latter.

Simplicity must nevertheless reflect the truth without reducing it excessively. The stake is, of course, democratic, but also impacts the performance of our organizations and the confidence we place in them.

In 2022, let's try to be simple and real. «

Bonjour à toutes et à tous,

Quelle année, encore, venons-nous de passer !

Je pense qu'il ne sera pas de trop, pour celle qui arrive, de nous souhaiter encore plus de santé, d'amour et de lien que ce qu'il est convenu de faire d'habitude.

Nous offrir aussi de belles capacités de résilience, et la force d'aller développer notre paix intérieur, pour vivre avec plus de douceur et de lâcher prise ces temps troublés et hors de notre commun.

Continuer à regarder en nous, pour voir mieux l'autre. Travailler notre intériorité, qui devient plus que jamais citoyenne, tant elle nous permet de maintenir les liens d'une société bien fragile aujourd'hui.

Mais hauts les cœurs ! 2022 sera l'année du renouveau, de l'espoir et de la joie. Pourquoi ? Parce qu'on peut en décider ainsi !

D'ailleurs, avez-vous choisi votre mot « totem » pour cette nouvelle année ?

Le mien sera « patience ». Et mon nouveau mantra : « Je ne mets mon énergie que là où elle est réciprocquée ».

Merveilleuse année 2022 à vous, chères lectrices et chers lecteurs de House of Ethics !

See you on the other side !

Hello everyone,

What a year, again, have we just lived!

I believe it won't be too much to ask for the upcoming year to wish for more health, love and bonds than we usually do.

To grant us solid capacities of resilience, and the strength to develop our inner peace, to live more gently and to let go of these troubled and unusual times.

To continue to look inside ourselves, to better see the other one. To work on our interiority, which is becoming more citizen than ever, as it allows us to progressively more to maintain the bonds of our nowadays' very fragile society.

But lift your spirits high! 2022 will be the year of renewal, hope and joy. Why ? Because we can decide it!

By the way, have you chosen your « totem » word for this new year?

Mine will be « patience ». And my new mantra: « I only put my energy where it is reciprocated ».

Happy new year 2022 to you, dear readers of House of Ethics!

See you on the other side!

Claudia
